===== Publish: 1 succeeded, 0 failed, 0 skipped ======
```

WarrantNow 2.0

Step 7: Once publish successful, release files created. Copy the file and paste into IIS Website physical folder.

During publish we need to take care below points:

1. Please do not copy Web.config file from Dev to UAT, Prod or Vice Versa. As it might override existing configuration setting.
2. If there is any new configuration, please add or update manually in Web.config file.

> This PC > Acer (C:) > WarrantNowService > Publish
